“ *Beginning in the days he taught me to run a mill and lathe safely 17 years ago, to the days he instilled in me the importance of absolute perfection in all that I do. From the lazy days hanging out in the office chit chatting Japanese to each other, to the countless hours spent trading stories of the critters the we are so particularly fond of. Those are the days I cherish and will so dearly miss. Godspeed buddy.*

*I'm late commenting here about a great guy I thought so very much of. How I met Richard was by trying to find a machine shop to make a small batch of specialized parts for a handicapped friend. Richard was glad to help out with his great skills. Never would've imagined that Richard and I had so much in common. We both liked airplanes and had been involved with the CAF. Only thing I wish is that he would've had time to teach me at least some of his machinist skills.*

*I enjoyed the many stories he shared over the years while visiting with him in his shop. I'm so thankful to have known him to the extent that I did. He was a special person I'm sure to many who knew him well. I had moved away about a year before Richard passed and had lost contact with him.*
